

Summer Opportunity—paid field research experience & professional development

Summer Opportunity for Science Teachers

Conduct cutting-edge field research in ecology and evolution and design research activities for your science students.
Do it this summer!

work with field biologists at a prairie research site

learn about the tallgrass prairie ecosystem

enjoy outdoor recreational opportunities

housing and travel covered plus modest stipend

submit your application for summer 2013 by January 31st

Visit the *Echinacea* project web page to learn more and apply:
