Location Explanation  
 There are two rows of plants. They are labelled as the North (N) and South (S) rows. Plant locations are determined by the row (N or S) and the distance (m) in the eastward direction from the western edge of the plot (marked by an

Note  
 When creating this sheet, it was assumed that the the rows of Big Blue Stem in Josh's plot start 1/2 meter from the western edge of the garden (marked by an aluminum barrier). THIS STILL NEEDS TO BE

E. Metal edge is at .4 m  
 Josh's #57 (N) is at .5 m  
 #56 (N) is at .68 m  
 #55 (N) is at .85 m  
 NESA (echinacea) is at 1 m

↳ should be +1  $\star$   $\sqrt{14}$

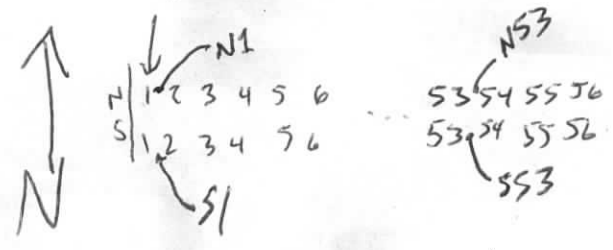

Eastern metal edge = 18.9 m East of western metal edge plot 19.1 m long

grasses spaced 1/3 m apart starting .15 m from

plant from ~~E~~ to West  
 W to East

# indicates Josh's plant
